## PARTIAL EXTRACTION THERAPY

Innovative techniques to preserve the patients own tissues  
Feel confident utilizing Partial Extraction Therapy

**12-13** September 2019.  
**ŠKOFJA LOKA**  
Slovenija

### LECTURE

Partial Extraction Therapy: trendy therapy?

What's behind?

What are the biological principles?

What does actual literature say?

Why is PET superior to other therapies especially for adjacent implants and multiple sites?

How does osseodensification help for implant site preparation?

Which are the most common complications and how to manage them?

### LECTURE

Root submergence therapy, socket shield preparation and post ex implant placement. Individual healing abutment production utilizing VPI cervico system.

This intense course is featuring the optimal procedures for site preservation and implant site optimization based on anatomy and biology. Partial extraction therapy, osseodensification and dentin graft utilization are innovative treatment modalities to preserve and enhance our patients own tissues.

### LEARNING OBJECTIVES

Learn innovative techniques to preserve the patients own tissues

Feel confident utilizing Partial Extraction Therapy

### COURSE PROGRAM

- 1 st day | Thursday, 12 September 2019.**
- 15 - 18** Lecture | Partial Extraction Therapy
- 2 nd day | Friday, 13 September 2019.**
- 09 - 11** Lecture | Novel treatments: osseodensification, dentin autograft for site preparation
- 11<sup>30</sup> - 12<sup>30</sup>** Live Surgery
- 13 - 14<sup>30</sup>** Lunch
- 14<sup>30</sup> - 17** Hands on: Root Submergence Therapy, Socket shield preparation with immediately implant placement
