

Snježana Pohl,
Dr. med., Dr. med. dent.

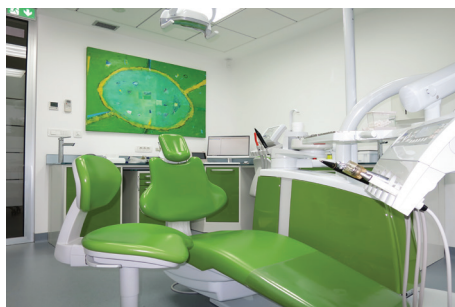

Snjezana Pohl is both doctor of human and dental medicine. She is a specialist in oral surgery and EDA certificated specialist for periodontology and implantology.

Currently she is joint owner and head of the Department for Oral Surgery in a private clinic (Rident). Designated as an assistant professor, she additionally is giving lectures at the Department of Oral Medicine and Periodontology at the School of Dental Medicine of the University of Rijeka.

In 2015 she became a DentalXP expert and a lecturer at worldwide dental meetings.

As an active lecturer in the fields of implantology and periodontology she underlines the importance of minimally invasive techniques especially in a comprehensive treatment methodologies based upon Preservation of tissues such as Partial extraction therapies, autogenous tissue utilization, Osseodensification and others.

OSSEODENSIFICATION
OPTIMIZE THE SITE - OPTIMIZE THE OUTCOME

SOFT TISSUE MANAGEMENT

PROGRAM

Day 1, Friday, 16. 3. 2018

OSSEODENSIFICATION OPTIMIZE THE SITE - OPTIMIZE THE OUTCOME

Osseodensification is a novel implant preparation technique that facilitates ridge expansion by compaction autografting. This implant site preparation technique increases biomechanical primary stability, bone mineral density, and Bone-to-Implant Contact. Crestal sinus floor elevation can easily be performed, without hammer and any other special equipment.

9:00 - 13:00

Lecture:

- How can we preserve bone, plastically expand it, and enhance its strength in a controlled method?
- The effect of Osseodensification on implant stability development for early and immediate loading.
- Risk assessment and avoiding complications.

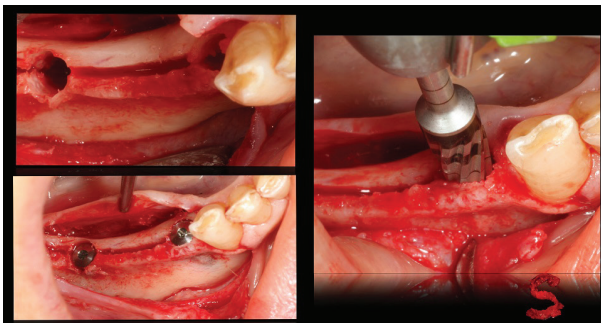

13:00 - 15:00

Lunch

15:00 - 18:00

Hands on:

- Sub - crestal sinus lift.
- Lateral ridge expansion.
- Immediate implant placement with OD.

Day 2, Saturday, 17. 3. 2018

SOFT TISSUE MANAGEMENT

This course provides an insight into all aspects of soft tissue management including flap design, connective tissue grafts and suturing techniques.

The proven techniques for recession covering are presented and compared.

Since the achievement of optimal aesthetics around anterior dental implants has been a major challenge for many clinicians, the emphasis of this course is on peri implant soft tissue management in an aesthetic zone.

9:00 - 13:00

Lecture:

- Importance of soft tissue thickness around implants.
- Soft tissue enhancement for peri-implant sites.
- Techniques for recession covering: Tunnel technique, VISTA technique, Zucchelli technique, Gum drop technique.

13:00 - 14:00

Lunch

14:00 - 17:00

Hands on:

- Free CTG harvesting.
- Tunnel technique for horizontal ridge augmentation.
- Tunnel technique for recession covering - multiple sites.

LO:

- Optimize the implant site utilizing the innovative surgical technique in your daily practice.
- Feel confident applying techniques for soft tissue enhancement in an aesthetic area.

Lecturer:

Snježana Pohl, dr. med., dr. med. dent.

DENTAL MARKET

Event information:

date: 16. 3. and 17. 3. 2018

place: DVORANA Z RAZGLEDOM,
Kapucinski trg 12,
4220 Skofja Loka
Slovenia

organizer: Dental market d.o.o.

price: 680 € + VAT
(for application before 16. 2. 2018)

780 € + VAT
(for application before 2. 3. 2018)

The lectures will be held in English.

For application send application form on e-mail:

izobrazevanja@dentalmarket.si

You will find application form and more informations on web page:
